The Royal Society of London
CONTENTS.

VOL. XXII.

No. 148.—December 1, 1873.

Anniversary Meeting:
  Report of Auditors ................................................... 1
  List of Fellows deceased, &c, since last Anniversary .......... 1
  Address of the President ............................................. 2
  Presentation of the Medals .......................................... 2
  Election of Council and Officers ................................ 12
  Financial Statement .................................................. 14 & 15
  Trust Funds .................................................................. 16-18

Account of the appropriation of the sum of £1000 annually voted by Parliament to the Royal Society (the Government Grant), to be employed in aiding the advancement of Science .............................. 19

Report of the Kew Committee ........................................ 20

December 11, 1873.

A Quantitative Investigation of certain Relations between the Gaseous, the Liquid, and the Solid States of Water-Substance. By Professor James Thomson, LL.D., Queen’s College, Belfast ............................................. 27

On the Bending of the Ribs in Forced Breathing. By Arthur Ransome, M.D. ................................................................. 42

December 18, 1873.

On the Period of Hemispherical Excess of Sun-spots, and the 26-day Period of Terrestrial Magnetism. By J. A. Brown, F.R.S. .......................... 43
On the Nervous System of Actinia.—Part I. By Professor P. Martin Duncan, M.B. Lond., F.R.S., &c. .................................................. 44

On certain Discrepancies in the published numerical value of π. By William Shanks ................................................................. 45

On Double Refraction in a Viscous Fluid in motion. By J. Clerk Maxwell, M.A., F.R.S., Professor of Experimental Physics in the University of Cambridge ................................................................. 46

List of Presents .................................................................................... 48

No. 149.—January 8, 1874.

On the Brom-Iodides. By Dr. Maxwell Simpson, F.R.S., Professor of Chemistry, Queen’s College, Cork ........................................... 51

A Memoir on the Transformation of Elliptic Functions. By Professor Cayley, F.R.S. ........................................................................... 56

On Electrotorsion. By George Gore, F.R.S. .................................................. 57

January 15, 1874.

January 22, 1874.

January 29, 1874.

Contributions to the Normal and Pathological Anatomy of the Lymphatic System of the Lungs. By E. Klein, M.D., Assistant Professor at the Laboratory of the Brown Institution, London ......................... 133

On the Comparative Value of certain Geological Ages (or groups of formations) considered as items of Geological Time. By A. C. Ramsay, LL.D., V.P.R.S. .................................................................................. 145

List of Presents .................................................................................... 148

No. 150.—February 5, 1874.

On the Anatomy and Habits of the genus Phronima (Latr.). By John Denis Macdonald, M.D., F.R.S., Staff Surgeon R.N., Assistant Professor of Naval Hygiene, Netley Medical School. (Plate I.) ......................... 154
On a Self-recording Method of Measuring the Intensity of the Chemical Action of Total Daylight. By H. E. Roscoe, F.R.S., Professor of Chemistry in Owens College, Manchester

Contributions to the History of Explosive Agents.—Second Memoir. By F. A. Abel, F.R.S., Treas. C.S.

February 12, 1874.

Note on the Synthesis of Formic Alddehyde. By Sir B. C. Brodie, Bart., F.R.S.

On the Influence of Brandy on the Bodily Temperature, the Pulse, and the Respirations of Healthy Men. By E. A. Parkes, M.D., F.R.S., Professor of Hygiene, Army Medical School

Experimental Demonstrations of the Stoppage of Sound by partial Reflections in a non-homogeneous Atmosphere. By John Tyndall, D.C.L., LL.D., F.R.S., Professor of Natural Philosophy in the Royal Institution

On the Division of a Sound-Wave by a Layer of Flame or heated Gas into a reflected and a transmitted Wave. By John Cottrell, Assistant in the Physical Laboratory of the Royal Institution

February 19, 1874.

On the Absorption of Carbonic Acid by Saline Solutions. By J. Y. Buchanan, Chemist on board H.M.S. 'Challenger'.

On the Number of Figures in the Period of the Reciprocal of every Prime Number below 20,000. By William Shanks

February 26, 1874.

The Winds of Northern India, in relation to the Temperature and Vapour-constituent of the Atmosphere. By Henry F. Blanford, F.G.S., Meteorological Reporter to the Government of Bengal

List of Presents

List of Candidates for Election into the Society

No. 151.—March 5, 1874.

The Localization of Function in the Brain. By David Ferrier, M.A., M.D., M.R.C.P., Professor of Forensic Medicine, King’s College, London
March 12, 1874.

On a New Deep-sea Thermometer. By Henry Negretti and Joseph Warren Zambra ................................................................. 238

March 19, 1874.

Note on the Intracellular Development of Blood-corpuscles in Mammalia. By Edward Albert Schäfer .......................................... 243

On the Attractions of Magnets and Electric Conductors. By George Gore, F.R.S. ....................................................................... 245

March 26, 1874.

On the Organization of the Fossil Plants of the Coal-measures.—Part VI. Ferns. By W. C. Williamson, F.R.S., Professor of Natural History in Owens College, Manchester ............................................... 248

On the Motions of some of the Nebulae towards or from the Earth. By William Huggins, D.C.L., L.L.D., F.R.S ............................................. 251

On the Annual Variation of the Magnetic Declination. By J. A. Brown, F.R.S. ................................................................. 254

List of Presents ........................................................................... 258

On the Nervous System of Actinia.—Part I. By Professor P. Martin Duncan, M.B. Lond., F.R.S., &c. (Plates II. & III.) ........................................... 263

No. 152.—April 16, 1874.

On the Pneumatic Action which accompanies the Articulation of Sounds by the Human Voice, as exhibited by a Recording Instrument. By W. H. Barlow, F.R.S., V.P.Inst.C.E. ......................................................... 277

Note on the Periodicity of Rainfall. By J. H. N. Hennessey, F.R.A.S. ................................................................. 280

Studies on Biogenesis. By William Roberts, M.D., Manchester ......................................................................................... 289
April 23, 1874.

On some Points connected with the Circulation of the Blood, arrived at from a Study of the Sphygmograph-Trace. By A. H. Garrod, B.A., Fellow of St. John's College, Cambridge; Prosector to the Zoological Society.......................... 291

Note on the Minute Anatomy of the Alimentary Canal. By Herbert Watney, M.A. Cantab............. 293

On the Refraction of Sound by the Atmosphere. By Prof. Osborne Reynolds, Owens College, Manchester .... 295

April 30, 1874.

The Structure of the Mucous Membrane of the Uterus and its Periodical Changes. By John Williams, M.D. (Lond.), Assistant Obstetric Physician to University College Hospital ..................... 297

On Leaf-Arrangement. By Hubert Airy, M.A., M.D........... 298

On the Improvement of the Spectroscope. By Thomas Grubb, F.R.S.... 308

May 7, 1874.

List of Candidates for Election into the Society ................. 310

Preliminary Experiments on a Magnetized Copper Wire. By Professor Balfour Stewart, LL.D., F.R.S., and Arthur Schuster, Ph.D...... 311

Note on some Winter Thermometric Observations in the Alps. By Prof. E. Frankland, F.R.S.......... 317

List of Presents .................................................. 329

On the Comparative Value of certain Geological Ages (or groups of Formations) considered as items of Geological Time. By A. C. Ramsay, L.L.D., V.P.R.S........... 334

No. 153.—May 21, 1874.

On the Structure and Development of Peripatus capensis. By H. N. Moseley, M.A., Naturalist to the 'Challenger' Expedition........... 344

The Uniform Wave of Oscillation. By John Imray, M.A., Memb.Inst.C.E. 350

On Combinations of Colour by means of Polarized Light. By W. Spottiswoode, M.A., Treas. & V.P.R.S............................. 354

Further Experiments on the Transmission of Sound. By John Tyndall, D.C.L., LL.D., Professor of Natural Philosophy in the Royal Institution 359

On some recent Experiments with a Fireman's Respirator. By John Tyndall, D.C.L., LL.D., Professor of Natural Philosophy in the Royal Institution 359
Election of Fellows ................................................................. 361

June 11, 1874.

On the alleged Expansion in Volume of various Substances in passing by Refrigeration from the state of Liquid Fusion to that of Solidification. By Robert Mallet, C.E., F.R.S. ................................................. 366

Note on the Excitation of the Surface of the Cerebral Hemispheres by Induced Currents. By J. Burdon Sanderson, M.D., F.R.S., Professor of Practical Physiology in University College, London .............................. 368

Spectroscopic Notes.—No. I. On the Absorption of great Thicknesses of Metallic and Metalloidal Vapours. By J. Norman Lockyer, F.R.S ................................................................. 371

Spectroscopic Notes.—No. II. On the Evidence of Variation in Molecular Structure. By J. Norman Lockyer, F.R.S. ................................................................. 372

Spectroscopic Notes.—No. III. On the Molecular Structure of Vapours in connexion with their Densities. By J. Norman Lockyer, F.R.S. ........ 374

Spectroscopic Notes.—No. IV. On a new Class of Absorption Phenomena. By J. Norman Lockyer, F.R.S. ................................................................. 378

June 18, 1874.

A Contribution to the Anatomy of Connective Tissue, Nerve, and Muscle, with special reference to their connexion with the Lymphatic System. By G. Thin, M.D. ................................................................. 380

Given the Number of Figures (not exceeding 100) in the Reciprocal of a Prime Number, to determine the Prime itself. By William Shanks. 381

On the Number of Figures in the Reciprocal of every Prime between 20,000 and 30,000. By William Shanks ................................................................. 384

Research on the Smallpox of Sheep. By E. Klein, M.D., Assistant Professor at the Laboratory of the Brown Institution, London ............. 388

Researches in Spectrum-Analysis in connexion with the Spectrum of the Sun.—No. IV. By J. Norman Lockyer, F.R.S. ................................................................. 391

An Account of certain Organisms occurring in the Liquor Sanguinis. By William Osler, M.D. (Plate V.) ................................................................. 391

On the Forces caused by Evaporation from, and Condensation at, a Surface. By Prof. Osborne Reynolds, of Owens College, Manchester. 401

Description of the Living and Extinct Races of Gigantic Land-Tortoises.—Parts I. and II. Introduction, and the Tortoises of the Galapagos Islands. By Dr. Albert Günther, F.R.S. 421

No. 154.—June 18, 1874 (continued).

On Dredgings and Deep-sea Soundings in the South Atlantic, in a Letter to Admiral Richards, C.B., F.R.S. By Prof. Wyville Thomson, LL.D., F.R.S., Director of the Civilian Staff on board H.M.S. 'Challenger.' 423

On the Centre of Motion in the Human Eye. By J. L. Tupper 429

Some Observations on Sea-water Ice. By J. Y. Buchanan, Chemist on Board H.M.S. 'Challenger' 431

On the Physiological Action of the Chinoline and Pyridine Bases. By John G. M'Kendrick and James Dewar, Edinburgh 432

Magnetic Observations at Zi-Ka-Wei. By M. Dechevrens, Director of the Observatory 440

Experiments with Safety-Lamps. By William Galloway, Inspector of Mines. (Plates VI. & VII.) 441

Tables of Temperatures of the Sea at various Depths below the Surface, taken between 1749 and 1868; collated and reduced, with Notes and Sections. By Joseph Prestwich, F.R.S., F.G.S. 462

On the Sun-spot Period and the Rainfall. By J. A. Broun, F.R.S. 469

List of Presents 473

No. 155.

On the Absorption of Carbonic Acid by Saline Solutions. By J. Y. Buchanan, Chemist on Board H.M.S. 'Challenger' 483

A Contribution to the Anatomy of Connective Tissue, Nerve, and Muscle, with special reference to their connexion with the Lymphatic System. By G. Thin, M.D. (Plates VIII.—XL) ................................. 515

On the Refraction of Sound by the Atmosphere. By Prof. Osborne Reynolds ........................................ 531

Index .................................................................................................................. 549

Obituary Notices of Fellows deceased :

ARCHIBALD SMITH ................................................................. i

ERRATA.
