INDEX to VOL. LV.

ABSINTHE epilepsy, the seat of origin and paths of conduction of the fits in (Boyce), 269.
Aitken (Sir William) obituary notice of, xiv.
Allen (E. J.) some points in the histology of the nervous system of the embryonic lobster, 407.
Alloys, on certain ternary, Part VIII. Alloys containing aluminium, cadmium, and tin; aluminium, antimony, and lead; or aluminium, antimony, and bismuth (Wright), 130.
—— on the liquefaction of silver-copper (Matthey), 265.
Aluminium, alloys containing (Wright), 130.
Antimony, alloys containing (Wright), 130.
Are spectrum of iron meteorites, on the photographic (Lockyer), 139.
Baillon (Henri Ernest) elected a foreign member, 290.
Baker (Sir Samuel White), obituary notice of, xxxiv.
Bakerian lecture (Thorpe and Rodger), 148.
Barton (E. H.) electrical interference phenomena somewhat analogous to Newton’s rings, but exhibited by waves along wires, 349.
Bidwell (S.) on the effect of magnetisation upon the dimensions of wires and rings of annealed iron, 228.
Bismuth, alloys containing (Wright), 130.
Blood, on the disappearance of the leucocytes from the, after injection of peptone (Bruce), 295.
—— in vivo, on the influence of carbonic acid and oxygen upon the coagulability of the (Wright), 279.
—— of the general circulation, note on some changes in the, consequent upon certain inflammations of acute and local character (Siseringhton), 161.
Bonney (T. G.) and C. A. Rasin, on rocks and minerals collected by Mr. W. M. Conway in the Karakoram Himalayas, 350, 469.
Boyce (R.) a contribution to the study of descending degenerations in the brain and spinal cord, and of the seat of origin and paths of conduction of the fits in absinthe epilepsy, 269.
Brain, a research into the elasticity of the living, and the conditions governing the recovery of the brain after compression for short periods (Levy), 275.
—— and spinal cord, a contribution to the study of descending degenerations in the, and of the seat of origin and paths of conduction of the fits in absinthe epilepsy (Boyce), 269.
Bridge (T. W.) and A. C. Haddon, note on the production of sounds by the air-bladder of certain Siluroid fishes, 439.
Bruce (D.) on the disappearance of the leucocytes from the blood, after injection of peptone, 295.
Brunton (L.) and S. Delépine, report on some of the changes produced on liver cells by the action of some organic and inorganic compounds, 424.
Bryce (James) admitted, 1.
Cadmium, alloys containing (Wright), 130.
Cajal (see Ramón y Cajal, S.).
Calamites, on (Williamson and Scott), 117.
Calamostachys, on (Williamson and Scott), 117.
Candidates for election, list of, 207.
Carbon dioxide, on the specific heat of, at constant volume (Joly), 390.
—— the specific heat of, as a function of temperature (Joly), 392.
Cat, the effect produced upon respiration by Faradic excitation of the cerebrum in the (Spencer), 61.
Cerebellum, experimental researches into the functions of the (Russell), 57.
Cerebral hemispheres, on the effects produced on the circulation and respiration by gunshot injuries of the (Kramer and Horsley), 278.
Cerebrum, the effect produced upon respiration by Faradic excitation of
the, in the monkey, dog, cat, and rabbit (Spencer), 61.
Chlorophyll, contributions to the chemistry of, No. V (Schunck), 351.
Coal-measures, correction of an error of observation in Part XIX of memoirs on the organisation of the fossil plants of the (Williamson), 422.
--- further observations on the organisation of the fossil plants of the, Part I. Calamites, Calamostachys, and Sphenophyllum (Williamson and Scott), 117.
Congestion, the pathology of the oedema which accompanies passive (Lazarus-Barlow), 62.
Conway, W. M., on rocks and minerals collected in the Karakoram Himalayas by (Bonney and Raisin), 350, 469.
Copper electrolysis in vacuo, on (Gannnon), 66.
--- sulphate and sulphuric acid, note on the action of, on metallic copper (Schuster), 84.
Cortex cerebri, preliminary note on bilateral degeneration in the spinal cord of monkeys (Macacus sinicus) following unilateral lesion of the (Mellus), 208.
Croonian lecture (Ramón y Cajal), 444.
Crystals, an instrument of precision for producing monochromatic light of any desired wave-length, and its use in the investigation of the optical properties of (Tutton), 111.
--- on hollow pyramidal ice (Grossmann and Lomas), 113.
--- of artificial preparations, an instrument for grinding section-plates and prisms of (Tutton), 108.
Davison (C.) on the straining of the earth resulting from secular cooling, 141.
Delépine (S.) and L. Brunton, report on some of the changes produced on liver cells by the action of some organic and inorganic compounds, 424.
Dewar (J.) statement on the phosphorescent behaviour of certain bodies when cooled, 340.
Diodemodon, on (Secley), 227.
Dog, the effect produced upon respiration by Faradic excitation of the cerebrum in the (Spencer), 61.
Earth, on the straining of the, resulting from secular cooling (Davison), 141.
Electrical interference phenomena somewhat analogous to Newton's rings, but exhibited by waves along wires (Barton), 349.
Electro-optics, experiments on a fundamental question in electro-optics: reduction of relative retardations to absolute (Kerr), 252.
Electrodes, on variations observed in the spectra of carbon (Hartley), 344.
Electrolysis in vacuo, on copper (Gannon), 66.
Emery (G. F.) thermoelectric properties of salt solutions, 356.
Epilepsy, the seat of origin and paths of conduction of the fits in absinthe (Boyce), 260.
Ethylene, the action of, upon heat (Lowes), 90.
Eyes, insect sight and the defining power of composite (Mallock), 85.
--- of horses, the refractive character of the (Smith), 414.
Fishes, note on the production of sounds by the air-bladder of certain Siluroid (Bridge and Haddon), 493.
Fletcher (L.) chemical analysis of the meteoric stone found at Makariva, near Invercargill, New Zealand, in the year 1886, 142.
Foreign members, election of, 390.
Fossil plants of the coal-measures, correction of an error of observation in Part XIX of memoirs on the organisation of the (Williamson), 422.
--- further observations on the organisation of the. Part I. Calamites, Calamostachys, and Sphenophyllum (Williamson and Scott), 117.
Fossil reptilia, researches on the structure, organisation, and classification of the (Seeley). Part IX. Section 1. On the Therosuchia, 224.—Section 2. On the reputed mammals from the Karroo formation of Cape Colony, 227.
--- Section 3. On Diademodon, 227.
Galton (F.) results derived from the natality table of Körösi by employing the method of contours or isogens, 18 (see Körösi).
Gannon (W.) on copper electrolysis in vacuo, 66.
Garrod (A. E.) a contribution to the study of the yellow colouring matter of the urine, 394.
Gases, on the specific heats of, at constant volume. Part II. Carbon dioxide, 390.—Part III. The specific heat of carbon dioxide as a function of temperature (Joly), 392.
Germination of the pollen grain and
the nutrition of the pollen tube, researches on the (Green), 124.
Government Grant of £4,000, account of the appropriation of the, 301.
Gray (P. L.) and W. E. Wilson, experimental investigations on the effective temperature of the sun, made at Daramona, Strecto, Co. Westmeath, 250.
Green (J. B.) researches on the germination of the pollen grain and the nutrition of the pollen tube, 124.
Griffiths (E. H.) appendix to a communication entitled “The mechanical equivalent of heat,” 23.
Grinding section-plates and prisms of crystals of artificial preparations accurately in the desired directions, an instrument for (Tutton), 108.
Grossmann (K.) and J. Lomas, on hollow pyramidal ice crystals, 113.
Gunshot injuries of the cerebral hemispheres, on the effects produced on the circulation and respiration by (Kramer and Horsley), 278.
Haddon (A. C.) and T. W. Bridge, note on the production of sounds by the air-bladder of certain Silurid fishes, 439.
Hartley (W. N.) on variations observed in the spectra of carbon electrodes, and on the influence of one substance on the spectrum of another, 344.
Hawksley (Thomas), obituary notice of, xvi.
“Heat,” appendix to a communication entitled “the mechanical equivalent of (Griffiths), 23.
— the action of, upon ethylene (Lewes), 90.
Heaviside (O.) on the transformation of optical wave-surfaces by homogeneous strain, 30.
Hill (L.) on intra-cranial pressure. Preliminary note, 52.
Hill (M. J. M.) on a spherical vortex, 219.
Homogeneous division of space, on (Kelvin), 1.
Horses, the refractive character of the eyes of (Smith), 414.
Horsley (V.) and S. P. Kramer, on the effects produced on the circulation and respiration by gunshot injuries of the cerebral hemispheres, 278.
Ice crystals, on hollow pyramidal (Grossmann and Lomas), 113.
Insect sight and the defining power of composite eyes (Mallock), 85.
Instrument for grinding section-plates and prisms of crystals of artificial preparations accurately in the desired directions, an (Tutton), 108.
Instrument of precision for producing monochromatic light of any desired wave-length, and its use in the investigation of the optical properties of crystals, an (Tutton), 111.
Intracranial pressure, on. Preliminary note (Hill), 52.
Iron, on the effect of magnetisation upon the dimensions of wires and rings of annealed (Bidwell), 228.
Joly (J.) on the specific heats of gases at constant volume. Part II. Carbon dioxide, 390.—Part III. The specific heat of carbon dioxide as a function of temperature, 392.
Karakoram Himalayas, on rocks and minerals collected by Mr. W. M. Conway in the (Bonney and Raisin), 350.
Kelvin (Lord) on homogeneous division of space, 1.
Kerr (J.) experiments on a fundamental question in electro-optics: reduction of relative retardations to absolute, 252.
Kew Committee, report of the, 307.
Körösi (J.) an estimate of the degree of legitimate natality, as shown in the table of natality compiled by the author from observations made at Budapest, 16.—Results derived from the natality table by employing the method of contours or isocens (Gatton), 18.
Kramer (S. P.) and V. Horsley, on the effects produced on the circulation and respiration by gunshot injuries of the cerebral hemispheres, 278.
Lazarus-Barlow (W. S.) the pathology of the oedema which accompanies passive congestion, 62.
Leucocytes, on the disappearance of, from the blood after injection of peptone (Bruce), 295.
Levy (A. G.) a research into the elasticity of the living brain, and the conditions governing the recovery of the brain after compression for short periods, 275.
Lewes (V. B.) the action of heat upon ethylene, 90.
Light, on the reflection and refraction of (Schott), 26.
— of any desired wave-length, an instrument of precision for producing monochromatic (Tutton), 111.
Liquation of silver-copper alloys, on the (Matthey), 265.
Liquids, on the relations between the viscosity (internal friction), and the chemical nature of.—Bakerian lecture (Thorpe and Rodger), 148.
Liver cells, report on some of the changes produced on, by the action of some organic and inorganic compounds (Brunton and Delépine), 424.
Lobster, some points in the histology of the nervous system of the embryonic (Allen), 407.
Lockyer (J. N.) on the photographic arc spectrum of iron meteorites, 139.
Lomas (J.) and K. Grossmann, on hollow pyramidal ice crystals, 113.

*Macacus sinicus*, preliminary note on bilateral degeneration in the spinal cord of, following unilateral lesion of the cortex cerebri (Mellus), 208.
Magneto-terem, on the relations of the secular variation of magnetic declination and inclination as exhibited on the (Wilde), 210.
Magnetic declination and inclination at London, Cape of Good Hope, St. Helena, and Ascension Island, as exhibited on the magnetometer, on the relations of the secular variation of the (Wilde), 210.
Magnetisation, on the effect of, upon the dimensions of wires and rings of annealed iron (Bidwell), 228.
Mallock (A.) insect sight and the defining power of composite eyes, 85.
Matthey (E.) on the liquation of silver-copper alloys, 265.
Mechanical equivalent of heat, appendix to a communication on the (Griffiths), 23.
Mellus (E. L.) preliminary note on bilateral degeneration in the spinal cord of monkeys (*Macacus sinicus*), following unilateral lesion of the cortex cerebri, 208.
Metallc copper, note on the action of copper sulphate and sulphuric acid on (Schuster), 84.
Meteoric stone found at Makariwa, near Invercargill, New Zealand, in the year 1886, chemical analysis of the (Fletcher), 142.
Meteorites, on the photographic arc spectrum of iron (Lockyer), 139.
Monkey, the effect produced upon respiration by Faradic excitation of the cerebrum in the (Spencer), 61.
Monkeys, preliminary note on bilateral degeneration in the spinal cord of, following unilateral lesion of the cortex cerebri (Mellus), 208.

Natality, legitimate, an estimate of the degree of, as shown in the table of natality compiled by the author from observations made at Budapest, (Körösi), 16.
Natality table of Körösi, results derived by employing the method of contours or isogens (Galton), 18.
Nerveux, la fine structure des centres.—Croonian lecture (Ramón y Cajal), 444.
Nitrogen gas, on an anomaly encountered in determinations of the density of (Rayleigh), 340.

Obituary notices of Fellows deceased:—Aitken, Sir William, xiv.
Baker, Sir Samuel White, xxxiv.
Hawksley, Thomas, xvi.
Owen, Sir Richard, i.
Tyndall, John, xviii.
Edema which accompanies passive congestion, the pathology of the (Lazarus-Barlow), 62.
Optical wave-surfaces, on the transformation of, by homogeneous strain (Heaviside), 30.
Owen (Sir Richard) obituary notice of, i.
Oxygen, phosphorescence of liquid, 340.

*Palaeon serratus*, on correlation of certain external parts of (Thompson), 234.
Phosphorescence of liquid oxygen, 340.
Poincaré (Henri) elected a foreign member, 390.
Poisson’s ratio, experimental determination of (Stromeyer), 373.
Pollen grain, and the nutrition of the pollen tube, researches on the germination of the (Green), 124.

Presents, lists of, 43, 64, 115, 128, 146, 159, 240, 243, 300, 383, 441.
Rabbit, the effect produced upon respiration by Faradic excitation of the cerebrum in the (Spencer), 61.
Radiation from sun spots, the thermal (Wilson), 246.
Raisin (C. A.) and T. G. Bonney, on rocks and minerals collected by Mr. W. M. Conway in the Karakoram Himalayas, 350, 469.
Ramón y Cajal (S.) la fine structure des centres nerveux.—Croonian lecture, 243 (Title only), 444.
Rayleigh (Lord) on an anomaly en-
INDEX.

Siluroid fishes, note on the production of (Bridge and Haddon), 439.
Siluroid fishes, note on the production of (Bridge and Haddon), 439.
Space, on homogeneous division of (Kelvin), 1.
Spectra of carbon electrodes, on variations observed in the, and on the influence of one substance on the spectrum of another (Hartley), 344.
Spectrum of iron meteorites, on the photographic arc (Lockyer), 139.
Spencer (W. G.) the effect produced upon respiration by Faradic excitation of the cerebrum in the monkey, dog, cat, and rabbit, 61.
Sphenophyllum, on (Williamson and Scott), 117.
Spherical vortex, on a (Hill), 219.
Stromeyer (C. E.) experimental determination of Poisson’s ratio, 373.
Suess (Eduard) elected a foreign member, 390.
Sulphuric acid and copper sulphate, note on the action of, on metallic copper (Schuster), 84.
Sun, experimental investigations on the effective temperature of the (Wilson and Gray), 250.
Sun spots, the thermal radiation from. Preliminary notes of observations made at Daramona, Streece, Co. Westmeath, 1893 (Wilson), 246.

Ternary alloys, on certain. Part VIII. Alloys containing aluminium, cadmium, and tin ; aluminium, antimony, and lead; or aluminium, antimony, and bismuth (Wright), 130.
Thermoelectric properties of salt solutions (Emery), 356.
Therosuchia, on the (Seeley), 224.
Thompson (H.) on correlation of certain external parts of Palæonorm serratus, 234.
Thorpe (T. E.) and J. W. Rodger, on the relations between the viscosity (internal friction) of liquids and their chemical nature. Bakerian lecture, 148.
Tin, alloys containing (Wright), 130.
Tutton (A. E.) an instrument for grinding section-plates and prisms of crystals of artificial preparations accurately in the desired directions, 108.
—an instrument of precision for producing monochromatic light of any desired wave-length, and its use in the investigation of the optical properties of crystals, 111.
Tyndall (John) obituary notice of, xviii.

countered in determinations of the density of nitrogen gas, 340.
Refraction, terrestrial, in the Western Himalayan Mountains (Walker), 217.
Reptilia, researches on the structure, organisation, and classification of the fossil (Seeley). Part IX. Section 1. On the Therosuchia, 224.—Section 2. On the reptiled mammals from the Karroo formation of Cape Colony, 227.—Section 3. On Diademodon, 227.
Respiration, the effect produced upon, by Faradic excitation of the cerebrum in the monkey, dog, cat, and rabbit (Spencer), 61.
Rodger (J. W.) and T. E. Thorpe, on the relations between the viscosity (internal friction) of liquids and their chemical nature. Bakerian lecture, 148.
Russell (J. S. R.) experimental researches into the functions of the cerebellum, 57.
Salt solutions, thermoelectric properties of (Emery), 356.
Schott (G. A.) on the reflection and refraction of light, 26.
Schunck (E.) contributions to the chemistry of chlorophyll. No. V, 351.
Schuster (A.) note on the action of copper sulphate and sulphuric acid on metallic copper, 84.
Scott (D. H.) and W. C. Williamson, further observations on the formations of the fossil plants of the coal measures. Part I. Calamites, Calamostachys and Sphenophyllum, 117.
Seeley (H. G.) researches on the structure, organisation, and classification of the fossil reptilia. Part IX. Section 1. On the Therosuchia, 224.
— Part IX. Section 2. On the reptiled mammals from the Karroo formation of Cape Colony, 227.
— Part IX. Section 3. On Diademodon, 227.
Sherrington (C. S.) note on some changes in the blood of the general circulation consequent upon certain inflammations of acute and local character, 161.
Siluroid fishes, note on the production of sounds by the air-bladder of certain (Bridge and Haddon), 439.
Silver-copper alloys, on the liquation of (Matthey), 265.
Smith (F.) the refractive character of the eyes of horses, 414.
Sounds by the air-bladder of certain
INDEX.

Urine, a contribution to the study of the yellow colouring matter of the (Garrod), 394.

Viscosity (internal friction) of liquids and their chemical nature, on the relations between the. Bakerian lecture. (Thorpe and Rodger), 148.
Vortex, on a spherical (Hill), 219.

Walker (J. T.) terrestrial refraction in the Western Himalayan mountains, 217.

Wilde (H.) on the relations of the secular variation of the magnetic declination and inclination at London, Cape of Good Hope, St. Helena and Ascension Island, as exhibited on the magnetarium, 210.

Williamson (W. C.) correction of an error of observation in Part XIX of the author's memoirs on the organisation of the fossil plants of the coal measures, 422.

Williamson (W. C.) and D. H. Scott, further observations on the organisation of the fossil plants of the coal measures. Part I. Calamites, Calamostachys, and Sphenophyllum, 117.
Wilson (W. E.) the thermal radiation from sun spots. Preliminary notes of observations made at Daramona, Streete, Co. Westmeath, 1893, 246.
— and P. L. Gray, experimental investigations on the effective temperature of the sun, made at Daramona, Streete, Co. Westmeath, 250.
Wright (A. E.) on the influence of carbonic acid and oxygen upon the coagulability of the blood in vivo, 279.
Wright (C. R. A.) on certain ternary alloys. Part VIII. Alloys containing aluminium, cadmium, and tin; aluminium, antimony and lead; or aluminium, antimony, and bismuth, 130.

ERRATUM.

Page 210, line 7 from bottom, for 20° 30', read 23° 30'.
