CONTENTS.

VOL. LXX.

No. 459.

Experimental Researches on Drawn Steel.—Part I. Magnetism and its Changes with Temperature.—Part II. Resistivity, Elasticity, and Density, and the Temperature Coefficients of Resistivity and Elasticity. By J. Reginald Ashworth. Communicated by Professor Schuster, F.R.S. .................................................................. 27

The Differential Equations of Fresnel's Polarisation-vector, with an Extension to the Case of Active Media. By James Walker, M.A., Communicated by Professor Clifton, F.R.S. ........................................ 37

No. 460.

On the Action of the Spurge (Euphorbia hiberna, L.) on Salmonoid Fishes. By H. M. Kyle, M.A., D.Sc., St. Andrews University. Communicated by Professor McIntosh, F.R.S. ................................................................. 48

On Chemical Dynamics and Statics under the Action of Light. By Meyer Wilderman, Ph.D., B.Sc. (Oxon.). Communicated by Dr. Ludwig Mond, F.R.S. ....................................................................... 66

On a Convenient Terminology for the Various Stages of the Malaria Parasite. By E. Ray Lankester, M.A., F.R.S., Director of the Natural History Department, British Museum ........................................ 74

Croonian Lecture.—On Certain Chemical and Physical Properties of Haemoglobin. By Arthur Gangee, M.D., F.R.S., Emeritus Professor of Physiology in the Owens College ................................................ 79
On the Development of the Layers of the Retina in the Chick after the Formation of the Optic Cup. By John Cameron, M.B., Ch.B. (Edin.). Communicated by Professor McIntosh, F.R.S. 84

The Classification of the Elements. By Henry E. Armstrong, V.P.R.S. 86

Persulphuric Acids. By Henry E. Armstrong, V.P.R.S., and T. Martin Lowry, D.Sc. 94

The Conditions Determinative of Chemical Change and of Electrical Conduction in Gases, and on the Phenomena of Luminosity. By Henry E. Armstrong, V.P.R.S. 99

No. 461.

On the Properties of the Arterial and Venous Walls. By J. A. Mac-William, M.D., Regius Professor of Physiology in the University of Aberdeen. Communicated by Sir M. Foster, Sec. R.S. 109

No. 462.

On the Interpretation of Photographic Records of the Response of Nerve obtained with the Capillary Electrometer. By George J. Burch, M.A., F.R.S., Physiological Laboratory, Oxford 194

Contributions to a Theory of the Capillary Electrometer. I.—On the Insulation Resistance of the Capillary Electrometer, and the Minimum Quantity of Electricity required to produce a Visible Excursion. By George J. Burch, M.A., Oxon., F.R.S., Lecturer in Physics, Reading College, Reading 221

On a Peculiarity of the Cerebral Commissures in certain Marsupialia, not hitherto recognised as a Distinctive Feature of the Diprotodontia. By G. Elliot Smith, M.D., Ch.M., Professor of Anatomy, Egyptian Government School of Medicine, Cairo, and Fellow of St. John's College, Cambridge. Communicated by Professor G. B. Howes, F.R.S. 226

A New Interpretation of the Gastric Organs of Spirula, Nautilus, and the Gastropods. By J. E. S. Moore and W. B. Randles, B.Sc. Communicated by Professor G. B. Howes, F.R.S. 231

Coefficients of the Cubical Expansion of Ice, Hydrated Salts, Solid Carbonic Acid, and other Substances at Low Temperatures. By James Dewar, M.A., D.Sc., LL.D., Jacksonian Professor, Cambridge University, and Fullcrum Professor, Royal Institution, London 237
Report of Absolute Magnetic Observations at the Valencia Observa-
tory (Cahirciveen, co. Kerry), 1899, 1900, and 1901. By J. E. Cullum. Communicated by the Earl of Rosse, F.R.S. ................................. 246

On some Phenomena affecting the Transmission of Electric Waves over the Surface of the Sea and Earth. By Captain H. B. Jackson, R.N., F.R.S. ................................................................. 254

No. 43.

On Electromotive Wave accompanying Mechanical Disturbance in Metals in Contact with Electrolyte. By Jagadis Chunder Bose, M.A., D.Sc., Prof. Presidency College, Calcutta. Communicated by Professor Reid, F.R.S. ................................................................. 273

On the Effect of a Longitudinal Magnetic Field on the Internal Viscosity of Wires of Nickel and Iron, as shown by Change of the Rate of Subsidence of Torsional Oscillations, By Professor Andrew Gray, F.R.S., and Alexander Wood, B.Sc., Houldsworth Research Student in the University of Glasgow .................................................. 294

The Spectra of Potassium, Rubidium, and Cesium, and their Mutual Relations. By Hugh Ramage, B.A., St. John's College, Cambridge. Communicated by Professor G. D. Liveing, F.R.S. ................................. 303

Contributions to the Study of Flicker. Paper II. By T. C. Porter, M.A., Eton College. Communicated by Lord Rayleigh, F.R.S. ......... 313

The Refractive Indices of Fluorite, Quartz, and Calcite. By J. William Gifford. Communicated by Silvanus P. Thompson, F.R.S. .......................... 329

Note on a Magnetic Detector of Electric Waves, which can be employed as a Receiver for Space Telegraphy. By G. Marconi, M.I.E.E. Communicated by Dr. J. A. Fleming, F.R.S. ....................................................... 341

A Note on the Effect of Daylight upon the Propagation of Electromagnetic Impulses over Long Distances. By G. Marconi, M.I.E.E. Communicated by Dr. J. A. Fleming, F.R.S. ................................. 344

No. 464.

A Portable Telemeter, or Range Finder. By George Forbes, F.R.S. .... 347

The Dissipation of Energy by Electric Currents induced in an Iron Cylinder when rotated in a Magnetic Field. By Ernest Wilson, Professor of Electrical Engineering, King's College, London. Communicated by Sir W. H. Preece, F.R.S. ................................................................. 359

On Skin Currents.—Part III. The Human Skin. By Augustus D. Waller M.D., F.R.S. ................................................................. 374

No. 465.

On the Toxic Properties of the Saliva of certain “Non-poisonous” Colubrines. By A. Alcock, M.B., LL.D., F.R.S., Professor of Zoology, and Leonard Rogers, M.D., B.S. (Lond.), M.R.C.P. F.R.C.S., Officiating Professor of Pathology in the Medical College of Bengal. 446

Effects of Strain on the Crystalline Structure of Lead. By J. C. W. Humphrey, B.Sc. (Vict.), 1851 Exhibition Research Scholar (University College, Liverpool), St. John’s College, Cambridge. Communicated by Professor Ewing, F.R.S. .................................................. 462

On the Correlation between the Barometric Height at Stations on the Eastern Side of the Atlantic. By Miss F. E. Cave-Browne-Cave, Research Student of Girton College, Cambridge, with some assistance from Karl Pearson, F.R.S., University College, London.............. 465

No. 466.

On an Approximate Solution for the Bending of a Beam of Rectangular Cross-section under any System of Load, with Special Reference to Points of Concentrated or Discontinuous Loading. By L. N. G. Filon, B.A. (Cantab.), M.A., B.Sc. (Lond.), King's College, Cambridge, Fellow of University College, London, and 1851 Exhibition Science Research Scholar. Communicated by Dr. C. Chree, F.R.S. .......................... 491

Antarctic Origin of the Tribe Schoenaea. By C. B. Clarke, F.R.S. (Plate 14)…………………………………………………………………………………………………………………… 496

On Two Methods for the Limitation and Regulation of Chloroform when administered as an Anesthetic. By A. Vernon Harcourt, F.R.S., Reader in Chemistry at Christ Church, Oxford ....................... 504

Index ........................................................................................................................................ 511
